DETAILED ACTION

The Examiner acknowledges the amendment filed March 16, 2007.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 21, the words "the sequence" is indefinite. It is unclear to the examiner if the sequence refers back to the "uninterrupted sequence" or a different sequence. In claim 1, line 22, the words "the time intervals" lacks antecedent basis. In line 19 Applicant refers to "the intervals" which refers back to lines 14-15 "at preselected intervals." Thus it is unclear if Applicant is referring to the latter intervals by stating the former since Applicant has not previously mentioned "time" prior to intervals; "the time intervals" could mean distinct time intervals.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Echerer US Patent Number 5,801,755 A.

The amended claim has not overcome the rejection of Echerer. See the response to arguments section below for details. See also previous office action(s) for details of rejections.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Echerer US Patent Number 5,801,755 A as applied to claim 1 above, and further in view of Reber et al. US Patent Number 5,950,632.

See previous office action for details of the rejection.

Response to Arguments

Applicant's arguments filed March 16, 2007 have been fully considered but they are not persuasive.

Applicant has claimed the Examiner's interpretation of the claims is incorrect. The Applicant does not state the perceived errors of the Examiner interpretation. Thus the Examiner's interpretation of the claims and rejection is maintained.

Art Unit: 3736

Additionally, Applicant argues that the prior art did not teach limitations of the claimed invention. However, Applicant uses intended use to assert these limitations. These limitations are given there due patent weight and the claims have been properly rejected.

As for the added limitation, due to Applicant's phrasing it is unclear to the Examiner what the broadest reasonable interpretation of the claim is. However, the examiner best guess is that the prior art reads on the claimed invention.

The Applicant is invited to request and interview to discuss language that would overcome the applied prior art reference(s).
